The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Examiner appreciates the recitation the MPEP abstract regulations for 371 cases. The objection is withdrawn.

Claims 1-13, 15-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The rejection of record is maintained. Examiner is unable to find the words "non-toxic" in the specification. The intention is evident, but the language is not supported. In fact, the statement that the compositions are less hypoallergenic than the prior art is at (b) on p.9. As to the declaration; the enclosure is not an EPA document, but rather a review, in '96. The review applicant cites indicates pyrethrum to be relatively non-toxic, but pyrethrum isn't claimed in claim 1. References submitted earlier shows pyrethrum to be at least allergenic. The "non-toxic" with recitation of amounts of the specific essential oil repellents as in claims 9-14 are seen as providing sufficient explanation of meaning of non-toxic for one in the art to understand.

Claims 1, 2, 5, 8, 16-18, 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Page -246, 335.

The rejection of record is maintained, even though the reference is old. Absent including the actives in their concentrations, there is no "non-toxic" for one in the art to fall back to in the instant specification to find; thus, given pages claiming the paraffin

impregnate product can be applied to skin (p.1, lines 42-57), it meets the applicants insert strip, even though page does not tell us what to do with his fabric-it can be used in many ways, with equivalents of Naphthaline, along with essential oils.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
